	Issued By: Dean Scott, Chief, US&R Branch Operations Section 		
Subject: USACE StS Central Division Regional Training Course, AZ-TF1 – October 1-2, 2022			

On behalf of the National Urban Search & Rescue (US&R) Response System (the System), in conjunction with the U.S. Army Corps of Engineers (USACE), a Structures Specialist (StS) Regional Training (RT) Course will be held at AZ-TF1 on October 1-2, 2022. This will be the third delivery of the 2022-2023 Version 7 curriculum.

This training course is offered to System StS personnel who need initial or refresher training. This training focuses on assessing structural behavior of damaged buildings, task force interactions during a System response, wide area assessment (GPS & Survey 123), use of StS forms, Champlain Tower Collapse case study, tabletop exercises and other topics. Students who completed StS1 training and any previous RT training are highly encouraged to attend this RT skills enhancement session. This training will sharpen and add to knowledge that will enhance System capabilities and readiness.

Applications should be submitted by September 10, 2022. To register for the course, fill out the online application at www.DisasterEngineer.org (select "Training Applications" from the top menu and click on the desired training course). After September 10th, students will be accepted on a first-come, first-served basis according to the waiting list. The training is provided at no charge to the student; however, travel, hotel, and per diem costs will be the responsibility of the student and/or their task force. Students will be responsible for transportation from their hotel to the training location. This updated curriculum is based on feedback from StS within, and in support of, the FEMA National US&R Response System. Under ESF #9, and by Interagency Agreement, the USACE is directed to provide and facilitate training for StS. **System StS are required to bring one task force Total Station and a tripod for each one or two StS a task force send to the RT training class.**

Any questions related to this training can be directed to Jeff Qunell, USACE US&R Program Manager at: (415) 503-6616 or: Jeffrey.J.Qunell@usace.army.mil. Alternate information contact is Alan Fisher (MA-TF1) at: afisher@cianbro.com.

DATE: June 27, 2022

SUBJECT: Regional Training for Structures Specialists, Central Division - Course Announcement

The Federal Emergency Management Agency's National Urban Search and Rescue (US&R) Response System, in conjunction with the U.S. Army Corps of Engineers (USACE), has scheduled a Structures Specialist (StS) "Regional Training" (RT) Course to be held October 1-2, 2022, at the Arizona Task Force 1 Training Site (AZ-TF1) in Phoenix. **This will be the THIRD delivery of the "Version 7" curriculum.** This training course is offered to Task Force StS who need initial or refresher training in Damaged Building Assessment, Crane Chart use, Shoring Size-up/Design, Survey 123, Task Force interactions during an US&R response and Advanced Total Station Monitoring. Students who completed StS1 training and any previous RT training are highly encouraged to attend this RT "skills enhancement" session. *Other non-engineer Task Force personnel are also encouraged to attend for awareness level training.* This training will sharpen and add to knowledge that will enhance the Task Force capabilities and readiness.

The Regional Training sessions are intended for Structures Specialists in the region to minimize or eliminate the impacts to one's daily job. The Central Regional Training doesn't preclude other StS from outside the region from attending. These weekend courses will consist of short review lectures, tabletops, and field exercises. The StS will be using the StS Forms for the tabletop and monitoring training portions of the class. The end result is for the StS to be as prepared as possible for a deployment.

Any Task Force will be allowed to send at least two students. If space is available, more students will be accepted. The Central Division Task Forces are encouraged to send as many of their StS as feasible due to the proximity of the training.

Applications should be submitted by September 10th. To register for the course, fill out the online application at **www.DisasterEngineer.org** (select "Training Applications" from the top menu and click on the desired training course). After September 10th, students will be accepted on a first-come, first-served basis according to the waiting list. The training is provided at no charge to the student. However, travel, hotel, and per diem costs will be the responsibility of the student and/or their Task Force. Students will be responsible for transportation from their hotel to the training location. This updated curriculum is based on the feedback from the Structures Specialists within and in support of the FEMA National US&R Response System. Under ESF#9, and by Interagency Agreement, the Corps is directed to provide and facilitate training for StS. *Task Force StS are required to bring one Task Force Total Station and a tripod for each one or two StS they send to the RT training class.*

TRAINING ANNOUNCEMENT

TO: National US&R Task Force Program Managers,
National US&R Task Force Leaders

Course Logistical Information:

Time: Saturday 0730 thru 1800 with 1/2 hour lunch period (box lunches with a drink will be available for no more than \$15) **and** Sunday 0800 thru 1330 (no lunch). Schedule established to permit late evening arrival Friday and late afternoon departure Sunday.)

These group reservations honor the Federal Government Rate for this area of \$151.00/night, tax excluded.

- The FEMA US&R StS Position Description recommends that Task Force StS complete this training every two years. This is continuing education, the 3rd scheduled training for this curriculum.
- Training focuses on assessing structural behavior of damaged buildings, crane chart review/field exercise, Task Force interactions during an US&R response, advanced Total Station monitoring, wide area assessment (GPS & Survey 123), use of StS forms, Surfside Collapse case study and other topics.
- Training mission is to provide two days (15-hours) of individual intensive hands-on training.
- Space will be limited to maximize hands-on field training and ensure mission success.
- Class tuition is free (meals, lodging & travel must be covered by Task Force, Agency, or students).
- Travel/transport from Phoenix Sky Harbor Airport to the targeted hotel is 2 miles.
- Travel from the aforementioned hotels to the training site is approximately 6 miles.

Training location: Phoenix Fire Department (PFD) / AZ-TF1 Training Site
2430 S. 22nd Avenue, Phoenix AZ 85009
POC: Frank Keller, (602) 256-3435, Frank.J.Keller@phoenix.gov

Shipping location: *Same as above.*

(NOTE: PFD personnel will ensure your equipment is secured at the training location. Individuals are responsible for packing and shipping their equipment to and from the training site. Return shipping must be 100% ready, packed, and include your shipping form/account. Provide your own shipping material, supplies and tape please. Instructors are not responsible for packing/funding shipment of total stations or tripods.)

Required Equipment:

- Laptop computer, hand held calculator, notebook, tape measure, Garmin GPS, Crosby User's Guide, FOG booklet.
- Nikon NPL-352, NIVO or Series N Total Station & tripod (1 per StS or team of two StS from each Task Force).
- One set minimum of the StS Forms from www.disasterengineer.org.
- Attire is official Task Force BDUs and/or Task Force t-shirt as well as standard PPE (helmet, boots, gloves, eye & ear protection, knee pads, sun block, rain gear, etc.).

To Register for Training:

Complete the online application at www.DisasterEngineer.org. On the top menu bar, select "Training Applications" then click on the desired training course to open the proper online application. After completing the application, click "SUBMIT." There is also Course Logistics Info available on this application page.
